# Key insights:

1. Sales grow by 26-32% annually — but Profit Margin remains at 12%
2. Discounts over 40% make the business unprofitable — Tables with a 29% discount are the only category in the red -\$64K
3. First Class delivery has 75% delays — the most expensive but the most unreliable
4.  4% of sales are returned — \$526K annually

**Key conclusion: The business is scaling, but without optimizing the discount policy, the growth in turnover does not convert into profit**
